## Ligature Resistant Combination Fixture

**M**etcraft's ligature resistant combination fixture is designed to reduce and/or eliminate tie holds in cells where suicide attempts are of concern. These fixtures are fabricated using heavy gauge stainless steel that is seamlessly welded to form a one-piece unit. Available in a wide variety of models, styles and options. Call Metcraft for more information.

• This option is available for floor mounted toilets.

## LIGATURE RESISTANT TOILET

**M**etcraft **Option MA** This fixture features a heavy gauge, integrally welded skirt from the rim height to the floor to inhibit its use as a tie hold. Available in a wide variety of models, styles and options. Call Metcraft for more information.

## LIGATURE RESISTANT SHOWERS

**PSH** shower heads have a conical shape that is virtually impossible to use as a tie hold.

Hugged Edges

Low Profile Push Buttons

Recessed Soap Tray

**Note:** Metcraft Industries does not encourage the use of a hand shower for ADA compliance in areas where suicide, violence or vandalism may occur. ADA guidelines make provisions for these areas, allowing a second fixed shower head to be installed at a height of 48" above the floor in lieu of the hand shower.

## LIGATURE RESISTANT URINAL

**T**he sloped top on this urinal is designed to thwart attempts to use the fixture body as a tie hold for suicide attempts. These units flush at .5gpf and are offered in a wide variety of models, styles and options. Call Metcraft for more information.

## LIGATURE RESISTANT OPTIONS & ACCESSORIES

### PAPER HOLDER

The optional **PH** (recessed paper holder) is integrally welded to the fixture body with no projections or seams to enable a tie hold.

### PENAL FILLER/BUBBLER

The standard **B1** Penal filler/bubbler spout has tapered sides to inhibit its use as a tie hold for suicide attempts. This design has been a standard feature on our fixtures for more than 20 years. \*Also available in B3 filler only.

### STANDARD PUSH BUTTON

Our standard push buttons have a low profile to resist use as a tie hold.

### HEMISPHERIC FILLER SPOUT

Recently, there has been a requirement for hemispheric filler spouts. Metcraft Industries has responded with the **B1H** hemispheric spout. The **B1H DM** version of this spout is a variation especially designed for deck mounting.

### SHOWER HEAD

Our standard **PSH-1** and **PSH-2** conical shower heads are tie resistant.

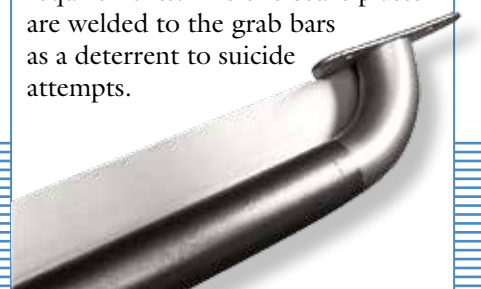

### AUTO RELEASE TOWEL HOOK

Our optional **HT** auto release towel hook is spring loaded to drop downward when weight (exceeding that of a bath towel) is applied.

### GRAB BARS

Grab bars with enclosure plates are available in various lengths and configurations to suit project requirements. The enclosure plates are welded to the grab bars as a deterrent to suicide attempts.
